Awake

It all started with *a prayer*

A few years back I prayed an intense prayer for the world. I had just seen something on the news that had upset me and I prayed intensely to Mother Mary. I asked how to turn our world around and how to relieve the suffering of so many. Suddenly I heard a soft feminine voice:

*'I can not do it for you' the voice said
but I can show you how.'*

With these words a beautiful, exiting and transformative journey started. A journey I would like to invite you for by sharing my music and by sharing my story.

During a time of spiritual awakening new songs and lyrics started *flowing through me*

I have been writing songs since I was fifteen years old. After years of performing in the Netherlands and abroad, I pursued a different kind of career as an entrepreneur and nutritionist. But during a time of spiritual awakening, new songs and different lyrics started to flow through me. These new songs are mostly about a new world, about new possibilities for our world.

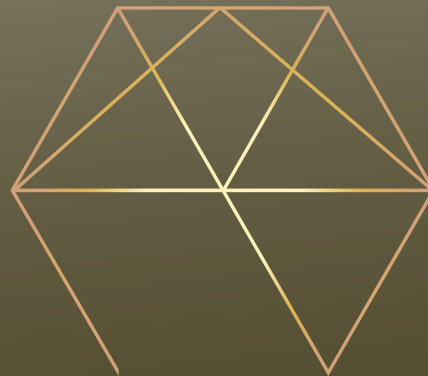

More and more I was tapping into a spiritual reality beyond our everyday experiences. In this realm I experienced the harmony and unity of all beings. And as I continue to align to this reality, I experience the presence of many loving guides who support humanity in what I believe to be The Great Change. They join me in the creation of my songs. Sometimes indirectly in the form of inspiration or directly with a song that carries their message. These are messages of hope, of love, of unity. To bring back to us the memory of who we truly are.

My album Awake

Although my songs are simple, they hold a great promise. I feel the energy of the message when it comes through me in song and I feel very blessed to be able to share them with you. The songs are part of my own awakening process and I have been receiving them, recording them, polishing them for the past five years. With every major step in my own process I received or wrote a new song about how we, humanity, can heal the deepest parts of ourselves, and restore the brother- and sisterhood of mankind. I had to be very patient keeping them to myself all this time. And now the time is right to share them with you.

Mariam works together with musician/music producer Eric Van Den Brink, whose work includes productions with artists such as Gerry Beckley (America), David Paton (Pilot, Alan Parsons Project, Kate Bush, Elton John), Blondie Chaplin (Beach Boys, Rolling Stones), Probyn Gregory (Brian Wilson Band), The Monkees and Paul Jones (Manfred Mann). He also created remixes for Yoko Ono Plastic Ono Band, Mason, a.o., and engineered tracks with Jan Akkerman, and Herman Brood with Dick Dale, Nina Hagen, Hans Dulfer & Candy Dulfer.

If it feels right for you to support me in spreading these songs of awakening I would be very happy to contribute to your online- or offline event, podcast, vlog/blog, YouTube channel or radio show.
